

Ritesh Maruti Noukudkar

Software Engineer | Java & Python Developer | Full Stack Developer

Maharashtra, India | riteshnoukudkar@gmail.com | +91-9067140037 | linkedin.com/in/riteshnoukudkar | github.com/riteshnoukudkar

Professional Summary

Computer Science Engineering graduate (B.Tech., 2026) with hands-on experience in Software Development, Java, Python, Spring Boot, REST APIs, SQL, and Object-Oriented Programming (OOP). Published Research Author (IJAR SCT) and Award-winning project developer with proven Automation Experience, having reduced manual processing overhead by 30% and delivered zero-defect releases across 5+ client applications. Strong foundation in Data Structures, Algorithms, SDLC, Agile methodology, Git/GitHub, and Backend Development.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL, HTML, CSS
- **Frameworks & APIs:** Spring Boot, Hibernate, JPA, REST APIs, MVC Architecture
- **Databases:** MySQL, SQL Server, Database Design, Query Optimization, Indexing, Stored Procedures
- **Developer Tools:** Git, GitHub, Postman, VS Code, Android Studio, Maven
- **Core CS Concepts:** Data Structures, Algorithms, Object-Oriented Programming (OOP)
- **Testing:** Unit Testing, Functional Testing, Integration Testing, Test Case Design, Defect Tracking
- **Software Engineering Practices:** SDLC, Agile/Scrum, Code Review, JWT Auth, Documentation, Requirements Analysis

Professional Experience

Software Development & Automation Intern

Jan 2024 – Jun 2024

Crientors Automation Solutions Pvt. Ltd, Belagavi

- Engineered automated Python workflows that reduced manual processing overhead by 30% and improved application performance across client deployments.
- Collaborated with cross-functional teams to gather requirements, author documentation, and deliver production-ready code within Agile sprints.
- Built data validation modules and automated integration tests, achieving 100% data integrity across 5+ client applications with zero critical post-deployment failures.
- Debugged and resolved software defects and data inconsistencies across application pipelines, improving code reliability and cutting rework by 20%.

Projects

DreamPlay-AI: AI-Powered Game Generation System

Python, OOP, Data Structures & Algorithms, Git, GitHub

- Architected an AI-powered game generation system using Python and Object-Oriented Programming principles, processing 10,000+ user interaction records to dynamically drive gameplay behavior.
- Designed modular, scalable game engine components to support maintainability and future feature expansion.
- Implemented intelligent game logic and optimized core algorithms, improving gameplay efficiency and reducing runtime overhead.
- Developed robust validation and exception-handling mechanisms, reducing application error rate by 25%.
- Executed comprehensive unit and functional test suites using Git/GitHub version control, improving software accuracy by 20%.

Bug & Issue Tracking System

Java, Spring Boot, Hibernate, JPA, MySQL, REST APIs, JWT, Maven, Git, Postman

- Designed and developed a secure Bug & Issue Tracking System using Java, Spring Boot, and MySQL, following MVC architecture best practices.
- Engineered RESTful APIs to support end-to-end issue lifecycle management: creation, assignment, priority, comments, and status tracking.
- Implemented JWT-based authentication and role-based authorization to secure application access and protect sensitive data.
- Optimized SQL queries and database relationships in MySQL, improving data retrieval performance and system responsiveness.
- Integrated input validation, structured logging, and exception handling; tested APIs thoroughly using Postman.
- Improved codebase maintainability through modular architecture, clean coding practices, and adherence to SDLC standards.

Research Publication

DreamPlay-AI: AI Game Generation

April 2026

Published in *International Journal of Advanced Research in Science, Communication and Technology (IJAR SCT)*, Volume 6, Issue 11, ISSN: 2581-9429

DOI: <https://doi.org/10.48175/IJAR SCT-33674> | Journal: ijarsct.co.in

- Published a peer-reviewed research paper in the International Journal of Advanced Research in Science, Communication and Technology (IJAR SCT).
- Conducted original research on AI-powered game generation, applying software engineering principles and algorithm optimization to design an intelligent game engine.

Education

Bachelor of Technology (B.Tech.), Computer Science & Engineering

Expected 2026

Sant Gajanan Maharaj College of Engineering, Maharashtra

Higher Secondary Certificate (HSC) – 62%, Guruvarya Gurunath Vithhal Patil Jr. College, Halkarni – 2022

Secondary School Certificate (SSC) – 85.20%, Shree Chhatrapati Shivaji High School, Mangaon – 2020

Certifications

- Android Development – Google
- AI-ML Virtual Internship – EduSkill
- SQL Server Foundation – Scholarhat (Passed SQL Skill Assessment)

Achievements

Published Research Paper – IJAR SCT | Jury Choice Award – ATOM Sympo 4.0 (Best Project among 100+ participants) | Best Project Award – PROTO2PROD (Top-ranked software project, design-to-deployment)
